Novirex® lozenges - order: info@dr-cattani-cosmetic.li

Oral hygiene in times of a pandemic is like disinfecting your hands, an important protection for yourself and others.

Viruses and bacteria are transmitted directly or indirectly through the mucous membranes of the mouth and nose by means of saliva droplets.

Novirex® the new hygiene product makes this possible. It naturally reduces germs directly in the mouth, nose and throat.

This has two advantages: firstly, the number of germs remains low, thus reducing the risk of becoming ill, and secondly, the number of germs that are potentially spread is reduced, which also reduces the risk of infection.

Ingredients:

Xylitol, Acidifier: citric acid, Releasing agent: sodium carbonate, Modified starch: sodium carboxymethyl starch, Releasing agents: talc, microcrystalline cellulose, magnesium stearate, polyvinyl polypyrrolidone, tea plant extract (1.6%) Sweetener: acesulfame K, Artemisia Annua extract (0.3%), Zinc citrate, Curcuma longa extract (0.04%).

Recommended Intake

Dissolve 2 lozenges in the mouth every two hours 4x to 5x daily. Maximum 10 lozenges per day. Do not chew or swallow lozenges.

Advice

Do not exceed the recommended daily intake stated.
